

Dear Marshall:

Just a brief note of congratulations from an old roommate on receipt of the of the 1966 Research Corporation Award. (including the cash award that accompanies this award)- There was a brief squint in the AMA Journal but my brother (Marnie) sent me a full page from one of his journals about same. Also, a belated congrats on the President's Award which I had not heard about and may be more of an honor than your most recent acquisition.

You have done wonderfully well since we last visited with you in Chicago and no doubt will continue in the same manner in the future. I have no doubt that you will be making that trip to Stockholm soon to meet the King of Sweden.

My folks were in D.C. last fall and talked with you via phone so I'm told. They are getting along nicely although both have had their share of illnesses the past few years.

I'm actively engaged in practice with two other men listed above. We have two children (1 ♀ - 1 ♂ ) and are expecting a third this summer. I was supposed to enter the Army (and Vietnam) in February but they have delayed the call now until the summer - perhaps (hopefully) this dirty conflict will be over by then.

I'm a staff member of the Barrow Neurological Institute in Phoenix--devoted to clinical care, clinical and basic research in nervous system illnesses. We have several biochemists on our staff who would be interested in hearing your work. Might give you an opportunity to come to this part of the country for a vacation away from the snow and cold of the East--plus providing a tax deduction. Would like to see you again soon and meet your spouse. In any event, give it a little thought.

Again, the basic purpose of this communication is to convey our warmest good wishes and congratulations on your recent award(s) and for continued good success in the future.

Lew
